AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

For the last few years, the legislature has taken action to improve the processing of evidence collection kits. Forensic labs have improved their ability to process these kits; however, the need for additional oversight is necessary to ensure that the labs are keeping up with state standards. Chapter 420 of the Government Code handles sexual assault prevention and provides rules and regulations for the crisis services. S.B. 608 would amend Section 420.034 by adding a clause that will require law enforcement to report data from their evidence collection from hospitals and other health care facilities.

Pursuant to Section 420.035(b) of the Government Code, law enforcement must work with health care facilities and hospitals to process evidence kits in a timely manner. The bill would require the reporting of evidence kits from hospitals and health care facilities within 14 days of the facility notifying a law enforcement agency.

S.B. 608 amends current law relating to reporting information regarding certain evidence collection kits.

RULEMAKING AUTHORITY

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
