### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

In recent years, we have seen increased attempts to steal intellectual capital at our higher education institutions. As Texas continues to conduct robust and cutting-edge research, we must also strengthen security protocols across our university systems.

The 88th Legislature passed S.B. 1565, which required the governing body of each higher education institution to establish a policy framework that addresses research security and designate a research security officer (RSO) responsible for the handling of classified material.

S.B. 1273 would build upon the work from the last session by creating a Texas Higher Education Research Security Council that will make a quarterly convening council of RSOs to develop state-wide research security protocols, establish accreditation for security excellence, create an annual training program for tier-one universities, and submit an annual report to the relevant committees and the attorney general of Texas. This collaborative effort will allow Texas to continue to be a national leader, ensuring Texas research is easy to conduct and hard to steal.

As proposed, S.B. 1273 amends current law relating to establishing the Higher Education Research Security Council.

### **RULEMAKING AUTHORITY**

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
