AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

Credit scoring can play a significant role in insurance rating for companies that utilize it. By analyzing this data, insurers categorize applicants into different tiers, which influence their ratings and determine the premiums they will pay.

Carriers are not required to update an insured's credit score and policy rating after the initial assessment, unless there was a proven error in credit information. Additionally, current law does not provide for insureds to receive notice from carriers if they are re-rated based on an updated credit score.

S.B. 1644 requires insurance companies that use credit scoring when rating policyholders to review and update their credit report every three years, using the most updated score. It also mandates that insurers provide written notice of any changes to an insured's policy ratings.

As proposed, S.B. 1644 amends current law relating to the use of a consumer's credit score in the underwriting or rating of certain personal lines property and casualty insurance policies.
