### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

By request of the Office of the Texas Attorney General, S.B. 2121 would aim to rectify clerical errors in the data broker law and associated sections of code. The data broker law in the Texas Business and Commerce Code aimed to enforce consumer protections and increase transparency around data collection. In this statute, a "data broker" is defined as "a business entity whose principal source of revenue is derived from the collecting, processing, or transferring of personal data that the entity did not collect directly from the individual linked or linkable to the data." However, Section 509.003 of the Business & Commerce Code, which establishes the business entities the data broker law applies to, uses the term "data broker" instead of "business entity," and creates a discrepancy. Data brokers have attempted to use this textual discrepancy to argue that the data broker law does not apply to them, which harms consumers and decreases vital transparency measures.

S.B. 2121 would make a clerical change by replacing the term "data broker" with "business entity" or similar changes to conform the data broker law. This would make it so that the law applies to the intended companies and is applied as originally intended.

C.S.S.B. 2121 amends current law relating to the regulation of certain business entities that act as data brokers.
