Fiscal Analysis

The bill would require the Texas Division of Emergency Management (TDEM) to develop a peer support network for first responders that would establish regional peer support hubs and connect first responders with clinical resources at no cost to the first responders. The network would be required to include: (1) peer-to-peer support; (2) training for peer service coordinators and peers that includes suicide prevention training; (3) technical assistance for program development and implementation; and (4) identification, retention, and screening of licensed mental health professionals.

Additionally, the bill would require an annual report from TDEM on certain information specified in the bill's provisions.

Methodology

Based on information provided by TDEM, it is estimated that the agency would need approximately \$2.0 million per fiscal year for the establishment of the regional peer support hubs. TDEM indicates that the provisions of the bill could be implemented by utilizing the private sector and sharing employees at the local level; however, any fiscal impact related to the cost associated with staffing these positions cannot be determined.

Local Government Impact

No significant fiscal implication to units of local government is anticipated.
