

LEGISLATIVE BUDGET BOARD
Austin, Texas

FISCAL NOTE, 89TH LEGISLATIVE REGULAR SESSION

April 17, 2025

TO: Honorable Drew Darby, Chair, House Committee on Energy Resources

FROM: Jerry McGinty, Director, Legislative Budget Board

IN RE: HB3334 by King (relating to wildfire prevention, mitigation, and response at certain wells under the jurisdiction of the Railroad Commission of Texas; authorizing an administrative penalty.), **Committee Report 1st House, Substituted**

Estimated Two-year Net Impact to General Revenue Related Funds for HB3334, Committee Report 1st House, Substituted: a negative impact of (\$42,731,528) through the biennium ending August 31, 2027.

The bill would make no appropriation but could provide the legal basis for an appropriation of funds to implement the provisions of the bill.

General Revenue-Related Funds, Five- Year Impact:

<i>Fiscal Year</i>	<i>Probable Net Positive/(Negative) Impact to General Revenue Related Funds</i>
2026	(\$23,065,054)
2027	(\$19,666,474)
2028	(\$2,448,990)
2029	(\$2,303,361)
2030	(\$2,157,732)

All Funds, Five-Year Impact:

<i>Fiscal Year</i>	<i>Probable Savings/(Cost) from General Revenue Fund 1</i>	<i>Change in Number of State Employees from FY 2025</i>
2026	(\$23,065,054)	4.0
2027	(\$19,666,474)	4.0
2028	(\$2,448,990)	4.0
2029	(\$2,303,361)	4.0
2030	(\$2,157,732)	4.0

Fiscal Analysis

The bill would establish wildfire prevention, mitigation, and response requirements for certain wells under the jurisdiction of the Railroad Commission (RRC).

The bill would require a wildfire compliance inspection before a well ownership transfer, if the well had been the subject of a formal complaint filed with RRC. The bill would prevent RRC from approving a proposed transfer if the well fails a follow up inspection after remediation efforts. The bill would also require RRC to assume control of orphaned, inactive, or noncompliant wells to ensure wildfire safety compliance and to to

direct electric utilities to terminate power to wells determined to be orphaned, inactive, or not in compliance with state laws and regulations pertaining to susceptibility to wildfires.

The bill would require RRC to suspend or revoke operating permits for operators who fail to comply with inspection or remediation requirements. The bill would authorize RRC to impose an administrative penalty of up to \$5,000 per violation per day and would allow the Attorney General to sue for penalty collection.

Methodology

Based on information from RRC, this analysis assumes that the bill would require \$23,065,055 in General Revenue Funds in fiscal year 2026 and \$19,696,475 in fiscal year 2027 with 4.0 FTEs each fiscal year to create a new program at the agency related to wildfire prevention. These costs are reflected in the table above. FTEs would include 3.0 Compliance Analyst IIIs (\$241,263) and 1.0 Administrative Analyst IV (\$48,511)

Costs reflected in the table above also include \$19,000,000 in fiscal year 2026 and \$19,000,000 in fiscal year 2027 for tank battery cleanups, and \$1,200,000 in each fiscal year after; \$516,000 in fiscal year 2026 and \$60,000 in each fiscal year after for electrical testing at orphaned well sites; \$82,354 in fiscal year 2026 and each fiscal year after for employee benefits; \$4,374 in fiscal year 2026 and each fiscal year after for the payroll contribution; and \$60,000 in fiscal year 2026 and \$30,000 each fiscal year after for other operating expenses. Capital costs include \$2,912,580 in fiscal year 2026 for IT costs, and \$582,516 for the same in fiscal year 2028, \$436,887 in fiscal year 2029, and \$291,258 in fiscal year 2030. These IT costs would be associated with a new system to collect third party inspections and make them publicly available, operator compliance activities (including tracking well fire safety inspection reports, wells that are not compliant with inspection requirements, and well transfer requests), and tracking orphaned well inspections and remediation activities.

Based on information from the Office of the Attorney General, any costs associated with legal work resulting from the enactment of this bill could be absorbed with current resources.

Based on the analysis of the Comptroller of Public Accounts, revenues associated with penalty revenues established by bill would be deposited to the credit of the General Revenue Fund, but cannot be determined due to their dependence of RRC rulemaking and the new and extensive nature of the penalties. Revenues would also be dependent upon the number of violations which is unknown at this time.

Technology

This analysis assumes a technology impact of \$2,912,580 in fiscal year 2026, \$0 in 2027, \$582,516 in 2028, \$436,887 in 2029, and \$291,258 in 2030. These IT costs would be associated with operator compliance activities (including tracking well fire safety inspection reports, wells that are not compliant with inspection requirements, well transfer requests, tracking wells with electric service termination requests, and tracking operator and orphaned well inspections and remediation activities.

Local Government Impact

No significant fiscal implication to units of local government is anticipated.
