

**LEGISLATIVE BUDGET BOARD**  
**Austin, Texas**

**FISCAL NOTE, 89TH LEGISLATIVE REGULAR SESSION**

**May 22, 2025**

**TO:** Honorable Charles Perry, Chair, Senate Committee on Water, Agriculture and Rural Affairs

**FROM:** Jerry McGinty, Director, Legislative Budget Board

**IN RE: HB5339** by Wilson (Relating to the establishment by the Texas Higher Education Coordinating Board of a grant program to support the study of regenerative agriculture at public institutions of higher education.), **As Engrossed**

The fiscal implications of the bill cannot be determined due to the unavailability of data related to the number of institutions that would participate in the program, funding available for grant awards, and any grant amounts that would be awarded.

The Higher Education Coordinating Board is required to implement a provision of the bill only if the legislature appropriates money specifically for that purpose. If the legislature does not appropriate money specifically for that purpose, the Higher Education Coordinating Board may, but is not required to, implement a provision of the bill using other appropriations available for that purpose.

The bill would require the Higher Education Coordinating Board to establish and administer the Higher Education Regenerative Agriculture Grant Program to fund eligible institutions of higher education to: (1) study successful regenerative agriculture operations and identify practices and methods to support persons in Texas seeking to implement regenerative agriculture on their land; (2) develop innovative, evidence-based methods to support agricultural producers in bioremediation and other scientifically supported techniques that promote beneficial soil bacteria and microorganisms and increase crop yields; and (3) provide students, agricultural producers, and rural communities with regenerative agriculture-focused education and technical assistance programs founded upon transparent and objective research protocols.

The Higher Education Coordinating Board indicates that the agency would need at least 3.5 FTEs to administer the grant program, including a director, manager, program specialist, and 0.5 database administrator. The estimated cost for salaries, benefits, and other operating costs related to administering the program would be \$348,557 in fiscal year 2026 and \$328,557 in fiscal year 2027 and subsequent years. The remaining fiscal impact of the grant program cannot be determined but would be dependent on the number of institutions that would participate in the program, funding available for grant awards, and any grant amounts that would be awarded.

**Local Government Impact**

No significant fiscal implication to units of local government is anticipated.
