Fiscal Analysis

The bill would amend the Government Code to establish the Texas Technology and Innovation Program (Program) to foster job creation and economic development by matching or supplementing federal funding received by businesses through the Small Business Innovation Research and Small Business Technology Transfer programs. The Office of the Governor (OOG) would establish and administer the Program. The Program would provide grants to certain businesses pertaining to specified requirements of each phase of the federal funding process.

Methodology

It is anticipated the OOG will need an additional 6.5 FTEs to support the Texas Technology and Innovation Program. The following positions are needed: 1 Manager IV, 3 Program Specialist V, 1 Compliance Analyst II, 0.5 Programmer IV, 0.5 General Counsel III, 0.5 Accountant IV. The total estimate for FTE-related and other operating costs in the 2026-27 biennium associated with the Program is anticipated to be \$1,737,490.

The OOG also indicates additional office space would be needed to support the additional staff. It is anticipated that the additional space would result in a two-year cost of \$21,209, assuming the space is leased.

Technology

The OOG indicates the cost to build and maintain the loan and grant management portal would be \$117,600 in fiscal year 2026 with a total cost of \$258,800 over the fiscal years 2026-2030.

Local Government Impact

No significant fiscal implication to units of local government is anticipated.
